

# From Spiez to the Grimsel Pass

## Summer hiking pleasure

## FROM SPIEZ TO THE GRIMSEL PASS

There are moments when everything is just right: sitting exhausted and happy among the stones and grasses at the top of the mountain. The view is clear and wide over the valley in the distance, the afternoon sun is mild, you are at peace with yourself, with the forests, meadows and paths you have encountered that day...

Even if the Jungfrau region is too beautiful to be true, it is: the mountains rise far into the sky, the valleys dig deep into the ground. Wild rivers carve their way through the rock and rush over huge waterfalls until they come to rest in Lakes Thun and Brienz.

The daily stages can be very individually arranged with lots of tips.
